

2013 Atlantic Coastal Fish Habitat Partnership Application Cycle

July 2012

The U.S. Fish and Wildlife Service (USFWS) and the Atlantic Coastal Fish Habitat Partnership (ACFHP) are requesting project proposals to restore and conserve habitat necessary to support coastal, estuarine dependent, and diadromous fish species. Federal funding available under the National Fish Habitat Partnership (NFHP) through the USFWS will be used to support the top ranked proposals. To ensure available funding is being directed most effectively, projects should be geared toward meeting ACFHP's protection and restoration objectives described in its [Conservation Strategic Plan](#).

The maximum amount available for an individual project is \$50,000. These funds can only be used for on-the-ground habitat conservation and improvement projects and related design and monitoring activities. The number of projects funded will be dependent upon the amount requested and funding availability.

Applications must be received by Friday, September 14, 2012 at midnight.
