

Parr Hydroelectric Project
Habitat Enhancement Program
2022 Request for Proposals
Proposals due July 31, 2022.

The Proposal Review Committee (PRC) of the Parr Habitat Enhancement Program (HEP) is soliciting proposals for natural resource stewardship grants in the Broad, Saluda, and Congaree River watersheds of South Carolina. The HEP Fund was established as part of the Comprehensive Relicensing Settlement Agreement (CRSA) during relicensing of the Parr Hydroelectric Project (Project) (Federal Energy Regulatory Commission [FERC] Project No. 1984). The HEP will be administered by the PRC to encourage, coordinate and fund project proposals that restore, enhance, and protect aquatic, wetland, and riparian habitats and the associated natural resources of the Parr Hydroelectric Project area and portions of the Broad, Saluda, and Congaree River watersheds (See HEP Area – Attachment A).

The PRC is comprised of representatives of Dominion Energy South Carolina, the National Marine Fisheries Service, U.S. Fish and Wildlife Service, U.S. Forest Service, South Carolina Department of Natural Resources, South Carolina Department of Health and Environmental Control, American Whitewater, Congaree Riverkeeper, American Rivers and CRSA signatory Jeff Carter.

Eligible project proposals must be of the following type:

- Conservation of lands for the purpose of protecting aquatic resources by fee simple acquisition, conservation easements, or other conservation measures agreed to by the PRC
- Restoration or enhancement of stream channels, stream banks, riparian areas, shorelines, and wetlands
- Removal of barriers to aquatic species
- Conservation, restoration, and enhancement of habitat for threatened and endangered species (T&E) and at-risk species, with an emphasis on aquatic species
- Conducting research, monitoring, enhancement of T&E and at-risk species' populations, with an emphasis on aquatic species
- Creation or construction of habitats and nesting boxes to support fish and wildlife species, with an emphasis on aquatic species
- Fertilizing and aquatic plant control in the Monticello sub-impoundment
- Conducting research and monitoring to support restoration of migratory fishes and other aquatic resources (such as conducting the fishway monitoring at Broad River diversion dam at the Columbia Canal should the FERC license be surrendered, and the Licensee is not obligated to continue this monitoring)
- Developing low-impact facilities to access waterways for fishing and boating
- Studies, design/engineering plans, monitoring, etc., are eligible for funding if their purpose is to support projects described in previous bullets

Geographically, proposals are limited to the area defined by the following watersheds or portions of watersheds (and federal hydrologic units codes (HUCs)) of the Broad, Saluda, and Congaree Rivers (also see map in Attachment A) (Reference: SCDHEC Watershed Atlas – <https://gis.dhec.sc.gov/watersheds/> - based on the National Watershed Boundary Dataset):

1. Lower Broad River 8 Digit Subbasin: HUC 03050106 – entire subbasin
2. Tyger River 8 Digit Subbasin: HUC 03050107 – that portion downstream of the towns of Pacolet and Woodruff

3. Enoree River 8 Digit Subbasin: HUC 03050108 – that portion downstream of the towns of Woodruff and Gray Court
4. Twelvemile Creek - Saluda River 10 Digit Watershed: HUC 0305010914 – entire watershed
5. Congaree River 8 Digit Subbasin: HUC 03050110 – entire subbasin

The Fund will consider funding proposals for projects that will be implemented in 2023. Multiple year projects will be also be considered. The present fund balance is \$87,234, with annual contributions of at least \$50,000 being applied to the total amount. The Fund is not obligated to spend a specific amount of funding in a given year.

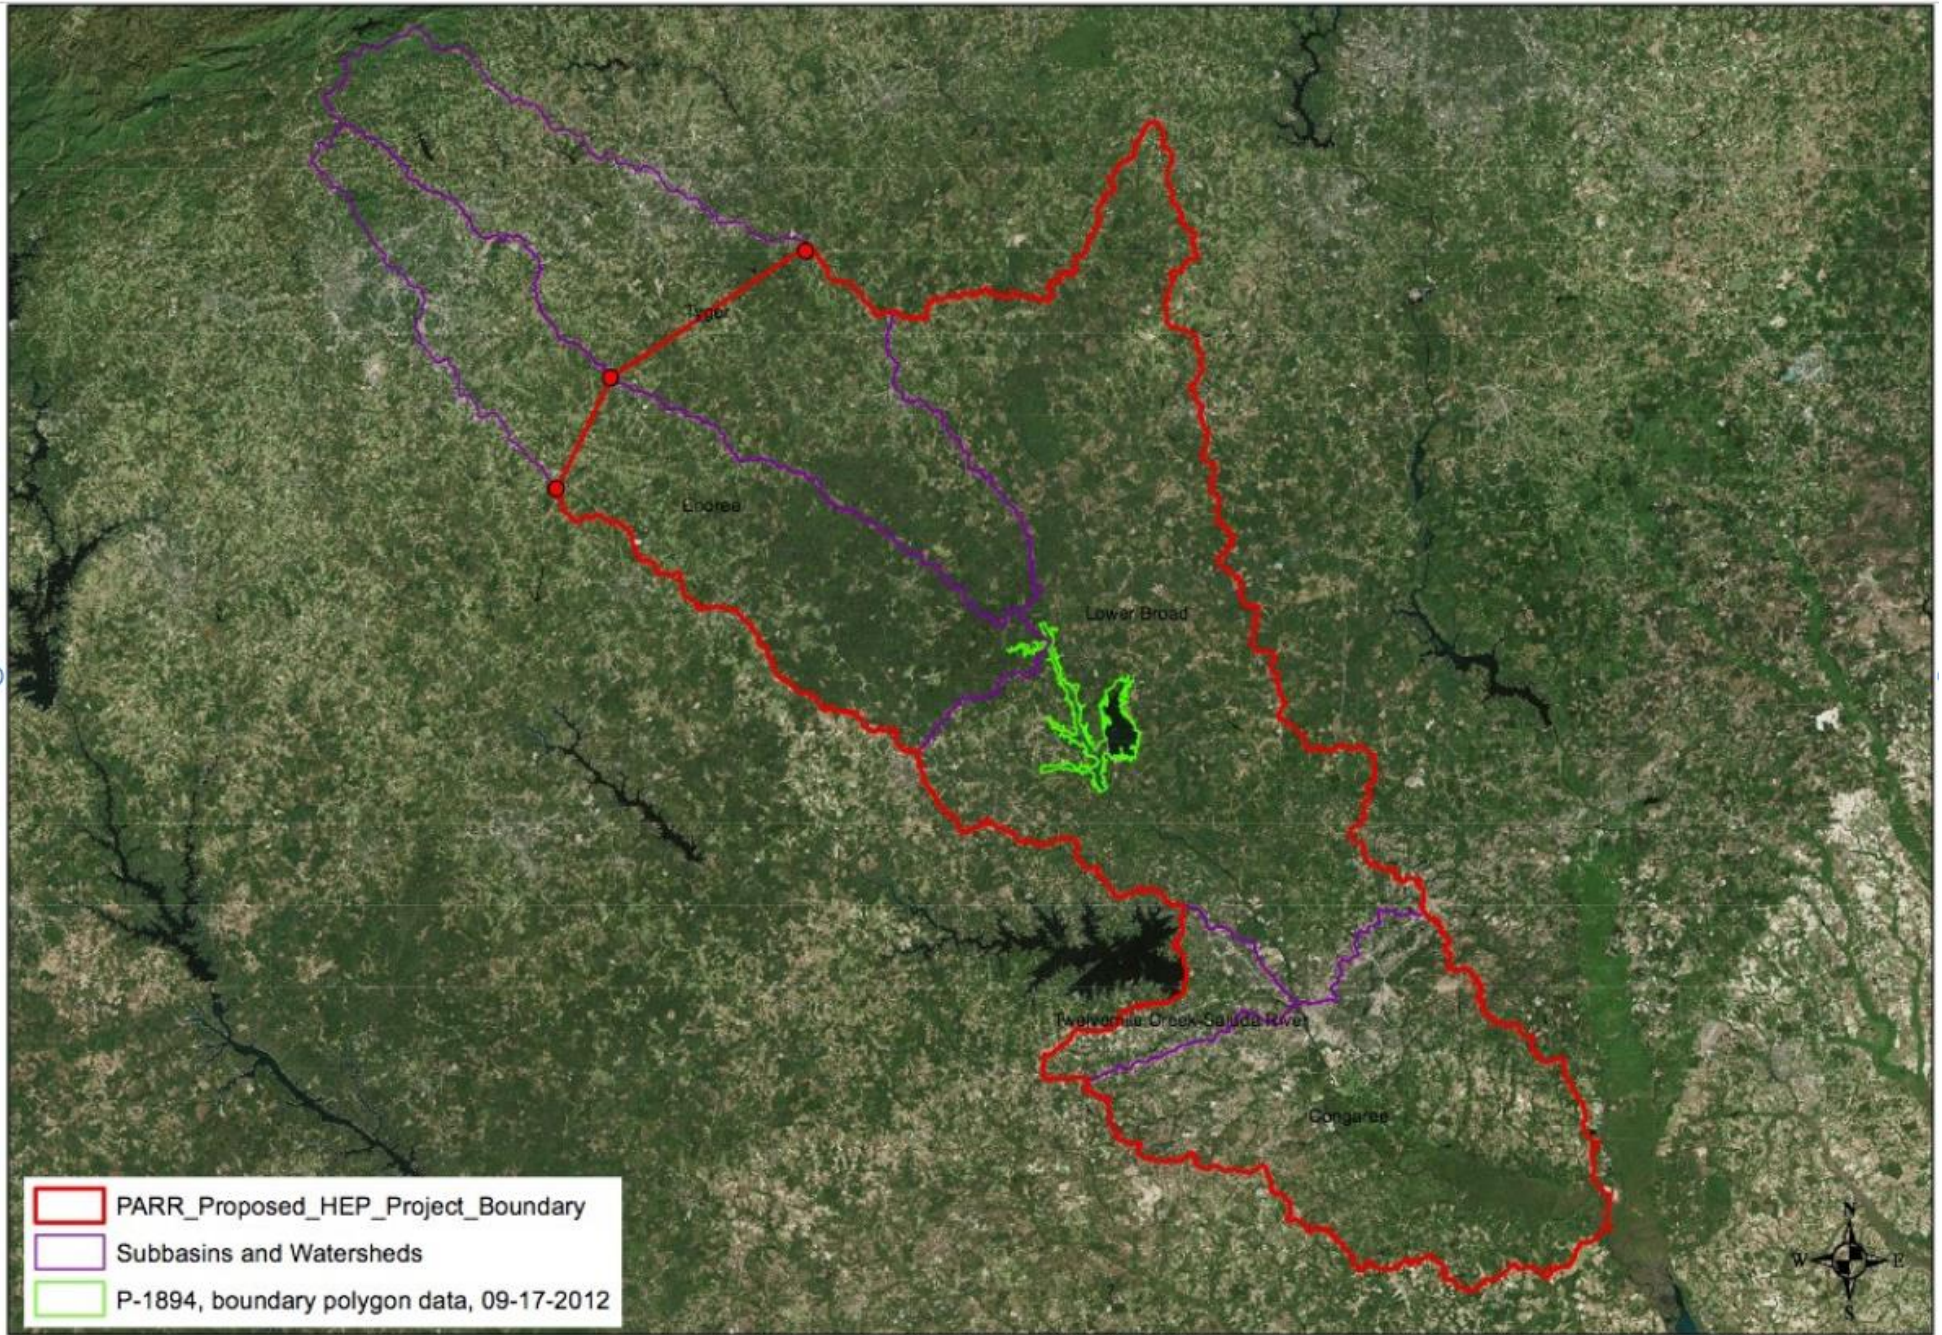

Proposals should be succinct (5 pages or less) and include a project introduction, objectives, approach, budget, and timeline. Match is not required although applicants are encouraged to document additional sources of funding that will be applied to their project.

Proposals are due by 5 pm eastern on July 31, 2022. Proposals should be submitted via email with the subject line “Parr HEP Fund Proposal” to Jennifer Gut, Kleinschmidt Associates¹: Jennifer.Gut@KleinschmidtGroup.com. For questions, please contact Jennifer via email or phone at 803.904.8680.

Proposals awarded funding will be required to submit a final report documenting geographic scope, methods, how funds (including matching funds, if applicable) were used to implement the project, and results. Multiple year proposals will be required to submit yearly interim reports.

¹ 2022 Fund Coordinator for the PRC.

Attachment A. Map of area for eligible HEP projects. The area is defined by the watersheds or portions of watersheds listed above.
